HISTOIRE
ÉPISTÉMOLOGIE
LANGAGE

An International journal, founded in 1979, published by
the Société d'Histoire et d'Épistémologie des Sciences du Langage

Aims and scope

Histoire Épistémologie Langage is an International Biannual Journal, founded in 1979, co-edited by the Société d'Histoire et d'Épistémologie des Sciences du Langage (International Society for the History and Epistemology of the Language Sciences, SHESL) and EDP Sciences. Its aim is to promote and spread original research and knowledge in this field. The historical dimension involves the documentation of models from other times and traditions, and is central to an understanding of evolutionary processes and their causes. Epistemology offers critical perspectives on all aspects of the language sciences: linguistics, grammar, rhetoric, logic, pragmatics, philosophy of language, semiotics.

Reviewing

An advisory editorial board and a scientific committee, composed of major international specialists in the subject, assist the associate editors in the reviewing process and play a consultative role.

Readers

Histoire Épistémologie Langage reaches an international readership and provides a scholarly meeting point for authors from universities and research centers in France, Europe and all over the world.

Contributions published in several European languages

Information

Frequency: 2 issues per year
